APPLICANT MUST COMPLETE THIS SECTION

I hereby certify that the requested electrical turn on is authorized by the owner of record and that I have been authorized by the owner to have electrical service restored to the property. I agree to conform to all applicable laws and codes of the City of York. I further acknowledge that I have read the electrical turn on inspection requirements below and understand that if the service fails I will be required to re-apply for an electrical turn on inspection after all deficiencies have been corrected. Any corrections will require me to obtain an electrical permit.

The following items must be in place to pass the Turn-On inspection.

Los siguientes artículos tienen que estar presente para pasar la inspección de encender la electricidad.

- | | |
|--------------------------------------------------------------|-----------------------------------------------------------------------------------|
| One driven ground rod inside or outside the house. | No open holes in cover plates. (Does not apply to new construction) |
| All metal piping (gas and water) bonded to ground. | Only one wire in each main lug. |
| Bonding jumper around water meter. | Service entrance cable must not be deteriorated. |
| Each breaker may only serve one circuit. | Must be able to close the meter box with no holes. |
| Una varilla de tierra impulsada adentro o afuera de la casa. | No hay huecos en la placa de cubierta. (No aplica a las casas bajo construcción.) |
| Toda la tubería metal esta conectada a la tierra. | Solo un cable por cada terminal principal. |
| Un Punte de unión a través del medidor de augua. | El cable de la entrada del servicio eléctrico no esta deteriorado. |
| Cada interruptor automático solo sirve a un circuito. | Se puede cerrar la caja de medidor cabal y sin huecos. |
